

ANASTASIIA ZHEMAITITE

Platform / DevOps Engineer

Chicago, IL · 843-446-5792 · a.zhemaitite@gmail.com · zhemaitite.com · linkedin.com/in/anastasiia-zhemaitite

SUMMARY

Platform / DevOps Engineer with 5+ years building production EKS platforms on AWS across fintech and healthcare. Core focus on GitOps delivery, zero-trust security, SLO-based alerting, and cost attribution. Integrates Claude Code and read-only MCP tooling so teams self-serve secrets and on-call responders get instant root-cause context in Slack.

PROFESSIONAL EXPERIENCE

Tempus • Chicago, IL

Sep 2023 – Present

Platform Engineer

- **Developer Platform & GitOps:** Built multi-account AWS EKS clusters with ArgoCD and GitHub Actions for 20+ microservices, ordering every release through sync waves and health checks — CRDs and secrets, then schema migrations, then application pods — so apps never start against a lagging migration. Ended the Slack-ping-platform-to-fix-a-rollback loop; 70+ engineers now deploy by merging a PR.
- **Secrets Automation & Compliance:** Built a Claude Code skill with our Security team that generates deterministic least-privilege IRSA policies, provisions AWS Secrets Manager entries, and emits Secrets Store CSI manifests for runtime mounting. Manual wiring had been pushing engineers toward over-permissive IAM just to ship; service teams now self-serve in ~3 minutes with nothing in Git.
- **Networking & Infrastructure Migration:** Led EKS cluster migration to IPv6-only to resolve VPC IPv4 exhaustion; engineered a DNS64/NAT64 translation path to bridge IPv4-only registries and GitHub endpoints, resolving 4 critical edge-case failure modes with 0 application code changes.
- **Streaming Data Infrastructure:** Architected a Strimzi Kafka ingestion pipeline on EKS for cold-chain vaccine telemetry, partitioning by container ID to spread load across brokers and committing offsets only after a successful write. Load-tested to 2M+ daily events with zero message loss — a crashed consumer resumes from its last committed offset.
- **Observability & Reliability:** Replaced static CPU/memory alerts with Datadog APM tracing, Prometheus metrics, and Grafana p99 latency SLO dashboards across 20+ services, paging only on latency and error-rate breaches — cutting on-call from ~35 pages a week to ~4 actionable ones.
- **AI-Assisted Incident Response:** Built a read-only MCP skill that correlates Datadog APM spikes with GitHub deployment diffs, replacing manual log-and-commit hunting to isolate breaking PRs and surface suspect authors directly in Slack.

Braintree • Chicago, IL

Mar 2021 – Jul 2023

DevOps Engineer (Sep 2022 – Jul 2023) · Junior Cloud Engineer (Mar 2021 – Sep 2022)

- **Zero Trust Access:** Replaced static SSH keys and legacy VPNs with Teleport Cloud across AWS and EKS, eliminating standing production privileges, capturing full command audit logs for incident triage, and maintaining a break-glass SSM Session Manager fallback with instant PagerDuty alerting.
- **FinOps & Cost Visibility:** Deployed Kubecost mapped to AWS billing rates and built daily per-namespace Slack digests showing each team its spend and its most over-provisioned pods. Teams right-sized their own Helm resource requests during sprint grooming, letting autoscalers pack onto fewer nodes — cutting non-production compute spend 30% over two quarters.
- **Disaster Recovery & Cluster Resilience:** Deployed Velero to automate daily EKS cluster snapshots to cross-region AWS S3, with quarterly restore drills into a clean staging cluster proving a sub-15-minute RTO for production workloads.
- **Infrastructure & Delivery Automation:** Refactored ad-hoc Python and Bash shell provisioning into modular Terraform and FluxCD pipelines, enforcing nightly terraform plan drift checks that surfaced uncommitted manual changes before compounding into production incidents, with remediation left to humans by design.

TECHNICAL SKILLS

Container & Orchestration: Kubernetes (EKS), Strimzi Operator, Secrets Store CSI driver, Velero

Cloud & Infrastructure (AWS): Multi-Account Organizations, IAM / IRSA, Secrets Manager

Infrastructure as Code, CI/CD & Delivery: Terraform, GitOps, ArgoCD, FluxCD, GitHub Actions, Bash, Python

Networking & Security: IPv6-only Clusters, DNS64/NAT64, Teleport, SSO / Short-Lived Certificates, Zero Trust

Observability & Incident Response: Datadog APM, Prometheus, Grafana, Kubecost, Incident Response

Data Infrastructure: Kafka, PostgreSQL

AI & Platform Automation: Claude Code, Model Context Protocol (MCP), Custom Agent Skills

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) · Certified Kubernetes Application Developer (CKAD) · HashiCorp Certified: Terraform Associate · AWS Certified Solutions Architect – Associate

EDUCATION

Certificate in Full Stack Web Development — Northwestern University, School of Professional Studies

2018

B.A. in Finance — Ivan Franko National University of Lviv, Ukraine

2013
